# PSF Registries

THE PLASTIC SURGERY  
FOUNDATION™

## General Registry of Autologous Fat Transfer (GRAFT)

*Principal Investigators: Babak Mehrara, MD and J. Peter Rubin, MD*

- Determining the safety and efficacy of fat grafting procedures
- Currently open to all board-certified plastic surgeons in the US and ASPS members in Brazil and Canada

Support provided by *Allergan* Allergan Aesthetics  
an AbbVie company

## Patient Registry and Outcomes For breast Implants and anaplastic large cell Lymphoma etiology and Epidemiology

*Principal Investigator: Colleen McCarthy, MD, MS*

- A collaboration between ASPS, The PSF, and FDA to examine if an association exists between women with breast implants and anaplastic large cell lymphoma (ALCL).
- Contribute a case today by visiting thepsf.org/PROFILE and clicking report a case.

## National Breast Implant Registry

*Principal Investigators: Andrea Pusic, MD, MS and Charles Verheyden, MD, PhD*

- In collaboration with FDA and breast implant manufacturers, NBIR helps women everywhere by collecting data on breast implants and procedures.
- Submit your device tracking data to the manufacturers using the NBIR today! To learn more visit thepsf.org/NBIR

## PSF Registries are part of the Plastic Surgery Registries Network (PSRN)

Support provided by *Allergan Aesthetics* *sientra*.  
an AbbVie company

# Clinical Studies

## Surgical Site Infection (SSI) and Antibiotic Use Study

*Principal Investigators: Christine Rohde, MD, MPH and Brian Gastman, MD*

- This study is the first interventional, multi-center, randomized control trial ever performed under the auspices of any plastic surgery society. This prospective, randomized control trial will compare the efficacy of two antibiotic regimens in preventing SSI in patients receiving immediate breast reconstruction with tissue expanders (TE-BR).
- This study will provide direct evidence for the appropriate duration of antibiotics in preventing SSI in implant-based plastic surgical procedures.
- Five U.S. sites will be enrolling patients for this study. Study set-up is in progress

## Finger Replantation And amputation: Challenges in assessing Impairment, Satisfaction and Effectiveness (FRANCHISE) Study

*Principal Investigator: Kevin Chung, MD, MS*

- Comparing treatment outcomes in digit amputation patients and evaluating impairment and disability using PRO instruments. The study findings are included in the following publications:
- Patient-reported and functional outcomes after revision amputation and replantation: The FRANCHISE multicenter, international, retrospective cohort study. JAMA Surg. 2019 Apr 17. doi: 10.1001/jamasurg.2019.0418.
- Reliability and validity of upper extremity patient-reported measures in assessing traumatic finger amputation management. Plast Reconstr Surg. 2020 Jan;145(1):94e-105e.
- Cost-effectiveness of Finger Replantation Compared With Revision Amputation. JAMA Network Open. 2019 Dec 2;2(12): e1916509
- Patient-Reported Outcomes after Digit Replantation and Revision Amputation: When is Maximum Recovery Attained? Submitted to Journal of Hand Surgery: European Volume

## It helps protect your patients and our specialty.

A commitment to safety and better patient outcomes is the very bedrock of our specialty. The Plastic Surgery Foundation has developed the National Breast Implant Registry (NBIR) in collaboration with the FDA and breast implant manufacturers to help advance that commitment.

The NBIR is a quality improvement initiative and safety surveillance registry that collects clinical, procedural and outcomes data at the time of operation and any subsequent re-operations for all U.S. patients receiving breast implants. The NBIR was also designed to capture data that is required for the purposes of device tracking – a federally-mandated requirement of manufacturers of implants. By participating in the NBIR, physicians can simultaneously submit device tracking data to the manufacturers and help to register all breast implants placed in the U.S.

Physicians who participate in the NBIR can study the information entered about their practice to learn more about their patients and common procedures and complications, and to compare their data to other plastic surgeons.

Breast implant manufacturers can use the information collected in the NBIR to further study the safety of their products and for device tracking purposes.

**Register today at [ThePSF.org/NBIR](https://ThePSF.org/NBIR).**

Support provided by Allergan Aesthetics  MENTOR® sientra.

# SHARE

SURGEONS IN HUMANITARIAN ALLIANCE  
FOR RECONSTRUCTION RESEARCH AND EDUCATION

## Surgeons in Humanitarian Alliance for Reconstruction, Research and Education

### **SHARE**

Surgeons in Humanitarian Alliance for Reconstructive, Research and Education (SHARE) is a new program from The PSF that seeks to enhance collaboration to improve care and surgical capacity in regions with limited numbers of plastic surgeons but high incidence of conditions requiring plastic surgery treatment. The SHARE program is tailored to local learners and their environment through three core components: Global Learners, Global Educators and Global Researchers.

### **Global Learners**

SHARE Global Learners are residents and junior surgeons from around the world who have demonstrated interest and ability in plastic surgery to establish an online community for regular case presentations, lectures, collaboration and mentorship. Global Learners will receive mentorship and access to online educational materials from the American Society of Plastic Surgeons.

### **Global Educators**

SHARE Global Educators provide mentorship and instruction to the Global Learners Community with teaching opportunities that range from online lectures to short teaching trips to multi-week "Professor in Residence" opportunities (due to COVID-19 travel restrictions, teaching opportunities are temporarily limited to remote learning).

Applications for Global Educators are now being accepted. To apply, visit [https://plasticsurgery.formstack.com/forms/share\\_global\\_educators\\_program](https://plasticsurgery.formstack.com/forms/share_global_educators_program)

### **Global Researchers**

SHARE Global Researchers will receive mentorship from established PSF researchers and be provided access to existing PSF Research Fundamentals resources on grant writing, research methods, data analysis and manuscript writing. The goal is to expand the body of plastic surgery knowledge and shape the development of new research projects to enhance the specialty worldwide.

## The Impact of The Plastic Surgery Foundation Visiting Professors Program

The PSF Visiting Professors instruct Plastic Surgery Residents using their clinical, technical and educational expertise. Plastic surgery training programs benefit from the wealth of knowledge and innovative perspectives represented by the Visiting Professors.

### 2020-2021 Visiting Professors

#### Richard Baynosa, MD

*Evolution from dual plane to pre-pectoral breast reconstruction: Tips and tricks to maximize success and minimize complications.*

*Addressing the needs of breast cancer survivors post mastectomy.*

*A practical and scientific approach to the use of hyperbaric oxygen therapy (HBOT) in plastic surgery for compromised grafts and flaps.*

*Incorporating the robotic rectus abdominis myocutaneous (RRAM) flap into the algorithm for perineal and vaginal reconstruction.*

*Autologous breast reconstruction: Is the answer always a free flap?*

*The business of academic medicine: Demystifying the secrets of the ivory tower.*

*Pavement Burns: Man vs. Nature in the Desert.*

#### Devra Becker, MD

*Surgical Ethics: New Models for the Current Era*

*Quality Improvement: Distinguishing theater from reality*

*Beyond simulation labs: Effective strategies for the learner and teacher in surgical education*

*Panniculectomy and abdominoplasty: Current surgical techniques and state-of-the-art perioperative management*

*Abdominal wall reconstruction*

*Perineal reconstruction*

*Current concepts in non-melanoma skin cancers*

*Newest techniques in wound care*

#### David Greenspun, MD

*The lumbar artery perforator for breast reconstruction; "Love handles" repurposed*

*How to optimize the aesthetic results of autologous breast reconstruction: Approaches and techniques*

*One is often not enough: Conjoined bipedicle flaps for unilateral and bilateral breast reconstruction*

*Application of aesthetic body-contouring principles to microvascular breast reconstruction—implications for donor site selection and flap design•*

*Establishing and managing your private practice in reconstructive plastic surgery*

#### Summer E. Hanson, MD, PhD, FACS

*Autologous fat grafting – science and art*

*Oncoplastic breast reconstruction*

*Translational science of autologous fat Grafting*

*Adipose-derived cell therapy in reconstructive surgery*

*Evolution of breast reconstruction: What I've changed from 8 years of training to 8 years of practice*

*Controversies in the surgical management of lymphedema*

*Building a research program while building a practice*

*Approaching balance and avoiding burnout in a dual surgeon household*

**Text PSTM20 to 243725 to Donate to The PSF**

## **The Impact of The Plastic Surgery Foundation Visiting Professors Program**

The PSF Visiting Professors instruct Plastic Surgery Residents using their clinical, technical and educational expertise. Plastic surgery training programs benefit from the wealth of knowledge and innovative perspectives represented by the Visiting Professors.

# **2020-2021 Visiting Professors**

### **Scott D. Lifchez, MD, FACS**

*Management of rheumatoid arthritis of the wrist  
Extensor tendon balance, imbalance, and reconstruction  
Competency-based residency training  
Tips on fingertip reconstruction  
Thumb CMC arthritis, moving beyond excising the trapezium  
Cold and chemical injuries of the hand*

### **Jeffrey R. Marcus, MD**

*Basic rhinoplasty – Anatomy and function  
Tip rhinoplasty: The elements for success  
Cleft rhinoplasty: The perspective of a cleft surgeon/rhinoplasty surgeon  
Unilateral cleft lip repair  
Bilateral cleft lip repair  
Palate surgery: Step by step in HD  
Facial reanimation – The state of the art  
Donor nerves for facial reanimation*

### **Ash Patel, MD**

*Taking action to achieve professional well being  
Love or hate: Plastic surgery and the media  
Why building a diverse team matters  
Maximizing success in abdominal wall reconstruction  
Tips for perineal reconstruction  
Teaching emotional intelligence*

### **John Persing, MD**

*Why we operate on children with craniosynostosis: Development and function  
Detailed anatomy of crozon syndrome, cranium and face/airway: Surgical implications  
Detailed anatomy of apert syndrome, cranium and face: Surgical implications  
Detailed anatomy of pfeiffer syndrome, cranium and face: Surgical implications  
Surgical technique evolution in the treatment of craniosynostosis  
Vascular malformation of the face: Treatment approaches*

### **Warren Schubert, MD**

*Reflections of 30 years of work in nine developing countries  
Management of gunshot wounds to the face  
Algorithm for the management of mandible fractures  
Problems & solutions regarding orbital trauma & reconstruction  
Sequencing of pan-facial fractures  
Nasal-orbital-ethmoid (NOE) fractures  
Surgical approaches to the midface  
History of the management of internal fixation of the face*

# Thank you

THE PLASTIC SURGERY  
FOUNDATION™

## **Contributions** **July 1, 2019 – June 30, 2020**

The Plastic Surgery Foundation's excellence and leadership within the specialty depend greatly on the generosity of ASPS members. From annual gifts that make an immediate impact, to endowed gifts that support future generations of plastic surgeons, contributions to The PSF serve as the catalyst of innovation for our specialty.

Last year, your generous contributions, professional achievements and selfless enthusiasm enabled The PSF to perpetuate its reputation as the most distinguished research foundation in the specialty. Because of your generosity, The PSF provided grant funding for investigator-initiated research projects, international scholars at U.S. plastic surgery institutions, distributed Breast Reconstruction Awareness Fund grants to U.S.-based charities and awarded Charitable Care Breast Reconstruction Awareness Fund grants to cover breast cancer surgical care costs for women who otherwise could not afford reconstruction.

## **Thank You to the** **2020 Maliniac Inductees**

The Maliniac Circle was named for the co-founder of the American Society of Plastic Surgeons, Jacques Maliniac, MD. Fellows of the Maliniac Circle have made an outright gift of \$50,000 or more, or a minimum deferred gift of \$100,000. Maliniac Fellows advance plastic surgery to a higher level through research, innovation, and public service.

We thank them for their commitment to the specialty.

# PLASTIC SURGERY FOUNDATION ACHIEVEMENTS

## PERCENTAGE OF GRANT APPLICATIONS RECEIVED BY TOPIC

Grant applicants for 2020 requested more than \$4.1 million. The PSF Study Section Subcommittees of Basic and Translational Research and Clinical Research Evaluated 111 applications on the following topics:

- Breast (Cosmetic/Reconstructive) - 12%
- Composite Tissue Allotransplantation - 2.4%
- Cosmetic - 1%
- Cranio/Maxillofacial/Head and Neck - 7.7%
- Economic Analysis/Quality - 10%
- Education - 4.3%
- Fat Grafting - 4.3%
- General Reconstructive - 7.7%
- Hand or Upper Extremity - 5.8%
- Microsurgery - 5.8%
- Nerve/Peripheral Nerve - 7.2%
- Other - 3.8%
- Technology Based - 10.6%
- Tissue Engineering - 7.7%
- Wounds/Scar - 9.6%

## SUPPORTING RESEARCH

The PSF awarded more than \$860,000 to support 24 plastic surgery research proposals.

The Scott Spear Innovation in Breast Reconstruction Research Fellowship was awarded for the third consecutive year thanks to the generosity of the Spear family and to honor the memory of the late breast surgery pioneer and advocate.

This year, The PSF has awarded three PSF Directed Grants on Breast Implant Safety to encourage studies designed to assess breast implant safety, including local and systemic complications and illnesses related to breast implants.

Three Clinical Research Leaders Scholarships have been awarded this year to provide support for surgeons to enhance their skills in outcomes/translational/clinical research. Our total is now seven and a meeting of these scholars is taking place in conjunction with PSTM2020 to encourage collaboration and sharing their experiences with the ASPS-at-large.

The PSF Translational and Innovation Research Grant has now been awarded to six recipients to accelerate the translation of scientific discoveries and technical developments into practical solutions that improve human health through innovation funding. Some projects awarded in the initial years are reaching completion.

The Research Fundamentals of Grant Writing will be presented virtually at PSTM on Oct. 19 for all ASPS members.

The FRANCHISE (Finger Replantation and Amputation Challenges in Assessing Impairment, Satisfaction and Effectiveness) multicenter study completed data analysis; two papers accepted for publication.

The National Breast Implant Registry (NBIR) and the Patient Registry and Outcomes For Breast Implants and Anaplastic Large Cell Lymphoma (ALCL) Etiology and Epidemiology (PROFILE) continue their growth and are being used regularly by the plastic surgery community and the FDA to facilitate breast implant safety.

The Innovation in Wound Care Research and Academic Development Fellowship was launched this year to promote and support the career development of junior surgeon-scientists focused on advancing wound healing patient care through research and interested in building a competitive research lab.

## CHARITABLE GIVING

### Thank You to the 2020 Maliniac Inductees

Dr. John E. Gatti and Margaret M. Gatti, ESQ  
Dr. Gayle E. Gordillo  
Dr. Geoffrey and Lauren Sisk

### Breast Reconstruction Awareness Fund

**AWARDED**  
**\$207,060**

For awareness, charitable care and research in 2020

The 2021 Chicago & San Francisco BRA Events both have

**\$50,000**

fundraising goals to help support local breast reconstruction awareness programs and patients.

## PLASTIC SURGERY WORLDWIDE

The PSF International Scholars program enables 11 plastic surgeons annually from abroad to study at host plastic surgery institutions in the United States for three to six months.

The PSF Visiting Professors Program instructed residents in plastic surgery using their clinical, technical and educational expertise.

We are working together to meet the needs of plastic surgery worldwide. More than 60 countries supported The PSF. The top 10 global partners that contributed to The PSF in 2020 are:

- |           |           |                |             |              |
|-----------|-----------|----------------|-------------|--------------|
| 1. MEXICO | 3. JAPAN  | 5. IRAQ        | 7. CHILE    | 9. GERMANY   |
| 2. CANADA | 4. BRAZIL | 6. SOUTH KOREA | 8. COLOMBIA | 10. ANGUILLA |

The PSF is the engine that ensures safe and effective advances are available to patients around the world. Your generous contributions are the fuel that makes the engine run.

Each year, The PSF receives more funding requests than it can support, demonstrating excitement and passion for innovative and caring work our specialty provides. Please support The Plastic Surgery Foundation and together we can advance plastic surgery.

# Support The PSF throughout the year

THE PLASTIC SURGERY FOUNDATION™

## Close the Loop 5K

The Breast Reconstruction Awareness Close The Loop 5K is a virtual race that allows participants the opportunity to participate from wherever, anytime. Funds generated provide breast reconstruction educational opportunities and financial assistance to organizations that support uninsured or under-insured women. Donations are accepted year-round.

<https://p2p.onecause.com/bra5k>

*Supported by Allergan Aesthetics, an AbbVie company; Stryker; MicroAire, MTF Biologics and Integra Foundation*

## The PSF Silent Auction

Support The Plastic Surgery Foundation (PSF) by bidding for items through the annual PSF Silent Auction. Participants can purchase or bid online for a number of fantastic auction items. The PSF excellence and leadership within the specialty depend greatly on the generosity of ASPS members.

<https://one.bidpal.net/psfauction/welcome>

## Breast Reconstruction Awareness Day

Becoming a Breast Reconstruction Awareness Day Affiliate demonstrates an interest and desire to educate others about breast reconstruction and women's health. Host an online event or advertising campaign to confirm the importance plastic surgeons play during a woman's breast cancer journey. Join the movement!

***San Francisco Breast Reconstruction Awareness Fundraiser  
May 7, 2021***

***Chicago Breast Reconstruction Awareness Fundraiser  
June 9, 2021***

<https://www.thepsf.org/programs/breast-reconstruction-awareness-campaign>

## Text2Give

A new Text2Give campaign allows The PSF to collect mobile donations throughout the year. Donor information is safe and secure with full PCI compliance. Guests enjoy a 100% mobile optimized experience and all major credit and debit cards are accepted. Text2Give is an easy-to-navigate platform with robust functionality.
